

Professor Peter Horby, Professor Martin Landray
RECOVERY trial Co-chairs
Nuffield Department of Population Health
Oxford

18th March 2021

Dear Peter and Martin

RECOVERY trial DMC report

The RECOVERY trial DMC reviewed the safety and efficacy data that were available today for the 39,052 patients randomised (including 257 children and 103 women who were pregnant at entry). For the interventions still in active recruitment, the numbers included in the comparison of each agent with its control were respectively: REGN-COV2 (9,406), aspirin (14,733), baricitinib (2,722) and dimethyl fumarate (14).

We note that the aspirin arm has reached its planned sample size, but follow-up is not yet complete.

In the light of the available trial data and all relevant external information, we saw no cogent reason to modify the protocol or intake to the study.

The full DMC will next meet to review the safety and efficacy data for all treatments on 1st April 2021.

Yours sincerely

Professor Peter Sandercock, MA, DM, FRCPE, FESO, FWSO
Chairman RECOVERY trial DMC
Emeritus Professor of Medical Neurology, Centre for Clinical Brain Sciences

Cc DMC members, RECOVERY trial office.
