

Professor Peter Horby, Professor Martin Landray
RECOVERY trial Co-chairs
Nuffield Department of Population Health
Oxford

19th November 2020

Dear Peter and Martin

RECOVERY trial DMC report

The RECOVERY trial DMC reviewed the safety and efficacy data that were available today for the 17,597 patients randomised. For the interventions still in active recruitment, the numbers included in the comparison of each agent with its control were respectively: azithromycin (6,859), convalescent plasma (4,269), tocilizumab (1,858), REGN-COV2 (766), aspirin (629).

In the light of these data and the available external information, we see no cogent reason to modify the protocol or intake to the study.

We recommend continuing recruitment of eligible patients to all active arms of the trial. The DMC will next meet on 3rd December 2020.

Yours sincerely

Professor Peter Sandercock, MA, DM, FRCPE, FESO, FWSO
Chairman RECOVERY trial DMC
Emeritus Professor of Medical Neurology, Centre for Clinical Brain Sciences

Cc DMC members, RECOVERY trial office.
