Cambridge East REC  
E-submission

28 January 2021

Dear Sir or Madam

**Trial:** Randomised evaluation of Covid-19 therapy (RECOVERY)  
**EudraCT:** 2020-001113-21  
**IRAS:** 281712  
**REC ref:** 20/EE/0101

Please find enclosed an application for an expedited authorisation of a substantial amendment for the above trial. We are seeking retrospective approval for a safety measure that we have asked sites to take to ensure that participants who have already received antibody-based treatments (convalescent plasma or REGN-COV2) are informed about the optimal timing of their vaccination. This was done in an expedited fashion due to the rate of vaccination in the community.

We would like to request that this amendment is **category C**, as per the amendment tool.

I believe all the necessary documentation required for this submission is attached and look forward to hearing the outcome.

Please let us know if you require any further information.

Yours faithfully

A handwritten signature in blue ink, appearing to read 'Peter Horby', with a long horizontal flourish at the bottom.

**Professor Peter W. Horby**

BSc MSc MBBS FRCP FFPH PhD  
Chief Investigator, RECOVERY Trial  
Professor of Emerging Infectious Diseases and Global Health
