Cambridge East REC
E-submission

23 June 2020

Dear Sir or Madam

Trial: Randomised evaluation of Covid-19 therapy (RECOVERY)
EudraCT: 2020-001113-21
IRAS: 281712
REC ref: 20/EE/0101

Please find enclosed an application for an expedited authorisation of a substantial amendment for the above trial. The main reason for this amendment is to seek approval:

1. To remove hydroxychloroquine and dexamethasone (for adults only) from the protocol and patient information.
2. To allow patients to enter the trial and be randomized between convalescent plasma and control only (i.e. not also between the treatments in part A of the main randomization).

We would like to request that this amendment is a **category A** amendment with agreement from trusts requested within 3 working days (as previously discussed with HRA).

I believe all the necessary documentation required for this submission is attached and look forward to hearing the outcome.
