recruited

December 2022 Update

Thanks to you, RECOVERY has found four effective treatments for COVID-19:

Dexamethasone

An inexpensive steroid

Ronapreve

Synthetic monoclonal antibody therapy

Tocilizumab

A treatment for arthritis

Baricitinib

A treatment for arthritis

The study has also found eight treatments that do not work and continues to investigate other potential treatments.

**Thank you to everyone involved in RECOVERY.
Keep going, you are making a real difference!**
