Glossary/Logic

- a) *The search is based on most current data in Argus on the date of the report is generated.*
- b) *Based on the search criteria, the report includes cases where at least one event met the SUSAR criteria (Event is serious , unexpected and related to the suspect drug by either investigator or company)*
- c) *For identified SUSAR cases, all reported events are presented. Including events that do not meet SUSAR criteria*
- d) *Each row represents a unique combination of suspect products and events.*
- e) *Use the column 'SUSAR' to filter events that are considered SUSARs.*
- f) *Report excludes invalid cases.*
