

## TECHNICAL MEMO

### **RE: Shelf-Life extension of VIR-7831 Drug Product to 30-month**

The shelf-life of VIR-7831 Drug Product (DP) was assessed using the following stability data available to date: 24-month time point data from analysis of VIR-7831 Gen 1 DP batches, 18-month time point data from analyses of the GMP Gen 2 WuXi DP batches, and 12-month time point data from analyses of the GMP Gen 2 Parma DP batches. The overall stability between VIR-7831 Gen 1 and Gen 2 WuXi and Parma DP batches has been deemed comparable (*VQD-RPT-102561*).

Data from the shelf-life assessment supports amending the expiry period for the Gen2 Parma drug product lots currently being used in ongoing clinical studies out to 30-month (from their current 24-month period from date of manufacture) see report *VQD-RPT-202011, version 1.0 Expiry Extension Report for VIR-7831 DP*.
